

Event Registration Management System

Three Prompts for BCA Project Report

1. Flowchart Prompt

Create a neat flowchart for an Event Registration Management System with five modules: Participant Details, Event Details, Registration, Payment Details, and Registration Status. Use standard flowchart symbols and arrows. Show the complete process from participant entry to event registration, payment verification, and confirmation. Make it simple and suitable for a BCA project report.

2. ER Diagram Prompt

Create a neat ER diagram for an Event Registration Management System including five entities: Participant, Event, Registration, Payment, and Registration Status. Show primary keys, foreign keys, attributes, and relationships with proper cardinality. Use standard ER diagram notation and make it suitable for a BCA project report.

3. Algorithm Prompt

Write a simple step-by-step algorithm for an Event Registration Management System covering Participant Details, Event Details, Registration, Payment Details, and Registration Status. Include Start, participant data entry, event selection, registration, payment verification, status update, confirmation, and Stop. Use simple English and numbered steps suitable for a BCA project report.
