

1. Student Details

Prompt:

Create a Student Details module for a Library Management System. Add student registration with Student ID, Name, Course, Year, Department, Phone Number, Email, and Address. Provide options to Add, Edit, Delete, Search, and View student records. Use a simple, clean, user-friendly interface with proper form validation.

2. Book Details

Prompt:

Create a Book Details module for a Library Management System. Add Book ID, Book Name, Author, Publisher, Category, ISBN, Quantity, and Available Copies. Provide Add, Edit, Delete, Search, and View functions. Show the current availability of each book in a clear table.

3. Book Issue

Prompt:

Create a Book Issue module for a Library Management System. Allow the librarian to select a Student ID and Book ID, enter Issue Date and Due Date, check book availability, and issue the book. Automatically reduce the available book quantity and store the issue transaction.

4. Book Reservation

Prompt:

Create a Book Reservation module for a Library Management System. Allow students to search for books and reserve unavailable books. Store Student ID, Book ID, Reservation Date, and Reservation Status. Provide options to create, view, cancel, and manage reservations.

5. Return Tracking

Prompt:

Create a Return Tracking module for a Library Management System. Track issued books and their return status. Store Student ID, Book ID, Issue Date, Due Date, Return Date, and Fine Amount. Automatically identify overdue books and calculate the applicable fine. Provide a simple return and tracking interface.
